Revision History

Date	Version	Revision
2024/06/14	1.1.3.8	1. Optimize UI, change "on/off" to "On/Off". 2. Solve the problem that some numbers from 200-223 cannot be entered in the first byte of the IP address. 3. Standard software functions of FG and LA.
2024/04/26	1.1.3.6	1. Solve the problem of trigger holdoff fails. 2. Solve the problem of CAN decoding causing crashes with a small probability. 3. Modify the kernel solve the problem that scpi cannot be used on a computer with keysight driver installed. 4. Solve the problem of advanced trigger (Qualified, Nth Edge, Delay, Setup/Hold) parameters are not recalled. 5. Solve the problem of delay trigger level setting error. 6. Solve the problem of when the edge is set to Alternating, trigger jitter will occur when entering the other trigger type. 7. Solve some known problems. 8. Optimize waveform capture rate. 9. Optimize Self calibration speed. 10. Optimize UI.
2024/02/26	1.1.3.3	4. Solve the problem that Bode Plot cannot control sdg1000 5. Solve the problem that user probe coefficient is not restored after reboot. 6. Solve the problem that the screen does not support multi-touch.
2024/01/02	1.1.3.1	1. Initial formal release of SDS800X HD

Compatibility between Versions

Source Version	Object Version	Compatibility
1.1.3.6	1.1.3.8	Yes
1.1.3.3	1.1.3.8	Yes
1.1.3.1	1.1.3.8	Yes
1.1.3.3	1.1.3.6	Yes
1.1.3.1	1.1.3.6	Yes
1.1.3.1	1.1.3.3	Yes
