

SIGLENT exhibits at Embedded World 2019

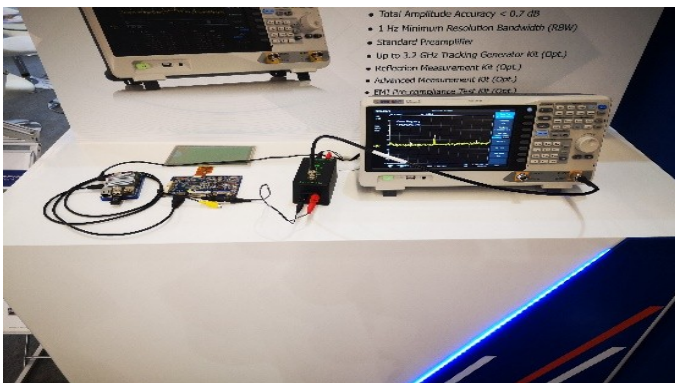

March 07, 2019

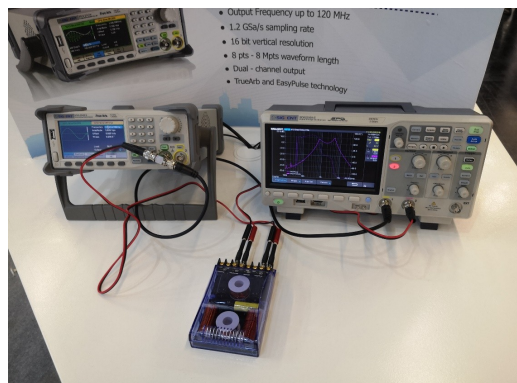

Nuremberg, Germany, February 26-28, 2019/ — SIGLENT Technologies, a global leader in the manufacturing of electronic test and measurement equipment, brought their new flagship SDS5000X oscilloscopes, SSA3000X Spectrum Analyzers, SDG6000X waveform generators and other products to this year’s Embedded World Exhibition.

As a leading international world fair with a focus on embedded technologies, it reflects the trends in the sector. More than 1,000 exhibitors presented state-of-the-art technology covering all aspects of embedded systems. Alongside them, SIGLENT showcased their comprehensive set of performance solutions to embedded applications, antenna matching and EMI debugging in booth 4-440.

- [The SDS5000X oscilloscope](#), with a bandwidth up-to 1GHz, a maximum sampling rate of 5GS/s, and a maximum acquisition memory of 250 Mpts, features powerful data analysis and well equipped to solve the complex challenges of embedded circuit design.
- Sensor and input simulation including temperature, pressure or flow responses can be difficult. SIGLENT offers a wide range of powerful arbitrary function generators to conquer the toughest T&M challenges, such as the [SDG6000X](#) & [SDG1000X Function/Pulse waveform generator](#).
- Embedded and IoT designs today incorporate higher data rates, RF connectivity and faster switching frequencies of DC/DC modules. SIGLENT’s [SSA3000X Spectrum Analyzer](#), with a frequency range from 9 kHz up to 3.2 GHz, provides EMI debugging and pre-compliance solutions, could help to ensure your EMC testing project passes in the first time.
- [The SVA1000X spectrum & vector network analyzer](#) is a powerful and flexible tool for broadcast and RF device testing. It delivers reliable automatic measurements and plenty of features, offers optional VNA capabilities which help to optimize antenna matching.

SIGLENT drew customers from all corners of the globe to their booth at Embedded World 2019. We firmly believe that SIGLENT is the best value in electronic and measurement instrumentation. We wish to thank everyone who came by our booth and we look forward to seeing you again next year!
