

SIGLENT Showcases High-Performance Test & Measurement Instruments at Electronica 2024 in Munich

November 20, 2024

On November 12-15, 2024, SIGLENT exhibited at Electronica 2024 in Munich, this marked SIGLENT's tenth year participating in the exhibition.

Held every two years, Electronica is one of the world's premier trade fairs of the electronics industry. Attracting thousands of global exhibitors and visitors, this event is a platform where the latest developments and trends in electronic components, systems, and applications are showcased. This year, SIGLENT showcased a range of sophisticated test and measurement solutions, drawing widespread attention from industry experts, engineers, and partners from more than 50 countries.

In particular, SIGLENT was proud to show off their SDS7000A Digital Storage Oscilloscope which with a bandwidth up to 6GHz. It's real-time sampling rate reaches up to 20 GSa/s and displays up to 4 analog channels + 16 digital channels for high performance mixed signal analysis.

In the RF field, SIGLENT also exhibited the 26.5 GHz vector network analyzer SNA6000A. With its high frequency, multi-port switch system, and high dynamic range, this analyzer provides powerful test support for RF signals in embedded systems.

SIGLENT paired the SNA6000A with the SSM5000A switch matrix, enabling expansion to up to 24 ports. Together with the TDA option, this setup allowed for multi-port testing of cables, harnesses, and more, making it ideal for high-volume testing on production lines.

In addition, SIGLENT also demonstrated our EMI test solution with the spectrum analyzer SSA3000X. Our EMI test solution provides low cost simplicity that can effectively help customers identify electromagnetic interference problems in the design and production process.

Beyond showcasing its products, SIGLENT was honored with the 10th Anniversary Award by ELEKTRONIKPRAXIS at this year's Electronica exhibition. This award highlights ELEKTRONIKPRAXIS's recognition of SIGLENT's decade-long commitment to innovation.

During the exhibition, SIGLENT's booth attracted numerous engineers at home and abroad, who came to visit and exchange insights. Many expressed their approval of SIGLENT's products, and the booth was crowded with visitors.

This was SIGLENT's tenth year participating in the Electronica exhibition, as well as the tenth anniversary of the establishment of SIGLENT's European subsidiary. Looking ahead, SIGLENT will continue to focus on research and innovation in electronic test and measurement technologies, providing engineers with more efficient and precise measurement solutions.

North American Headquarters

SIGLENT Technologies America, Inc
6557 Cochran Rd Solon, Ohio 44139
